COMPANY PROFILE

Building Capabilities.

Delivering Infrastructure.

Construction & Infrastructure Solutions | Since 2020 | Bangalore, India

ABOUT INFRALITH

Established in 2020 by Founder Sachin Nashi, Infralith is a construction and infrastructure solutions company focused on delivering reliable project execution, engineering expertise and workforce solutions.

We support construction, infrastructure, engineering, industrial, manufacturing, mining, power, telecom, oil & gas, renewable energy, real estate and EPC projects. Our capabilities extend from EPC projects, civil construction and infrastructure development to engineering consultancy, project management consultancy and technical manpower supply.

- **EPC & Infrastructure Development** — end-to-end solutions for construction and infrastructure projects.
- **Engineering & Project Management** — technical expertise, consultancy and coordinated project execution.
- **Skilled Workforce Solutions** — reliable deployment of skilled, semi-skilled and unskilled professionals.
- **Layout Development & Turnkey Projects** — End-to-end layout planning & turnkey project execution.

LEADERSHIP

Mr. Sachin Nashi, Founder. Under his leadership since 2020, Infralith has built a track record of hands-on project delivery, from smart-city road works and JJM water supply projects to pre-engineered building structures and defence infrastructure works.

Mr. Basanna Gowda, Project Coordinator.

Coordinates projects & site teams, workforce and technical requirements so that every project is executed to specification and schedule.

WHAT WE BELIEVE

Successful projects are built on three fundamentals: the right expertise, the right people and the right execution.

01
Right Expertise
Engineering consultancy, project management consultancy and technical know-how behind every project.

02
Right People
Skilled, semi-skilled and unskilled professionals deployed to match project needs.

03
Right Execution
Civil construction, EPC and turnkey delivery executed to specification and schedule.

CORE CAPABILITIES

01	**Civil Construction & Contracting**	Structural and civil works including PEB structures, roads, footpaths, drainage and general building works, executed to specification and schedule.
02	**Government & Private Projects**	Execution support for government infrastructure (smart city, JJM water supply, defence and public works) and private commercial and industrial projects.
03	**EPC Management**	Engineering, Procurement and Construction management, coordinating design, materials and execution under a single point of accountability.
04	**Workforce Solutions**	Engineers, architects, supervisors and project managers, with recruitment solutions for the MEP and EPC industry.
05	**Layout Development & Turnkey Projects**	End-to-end site layout planning and turnkey execution, from concept and master planning to design, construction and handover, as one accountable package.

INDUSTRIES WE SERVE

Construction	**Infrastructure**	**Engineering**	**Industrial**
Manufacturing	**Mining**	**Power**	**Telecom**
Oil & Gas	**Renewable Energy**	**Real Estate**	**EPC Projects**

WHY CHOOSE US

Integrated Execution
A single accountable team across design, construction, procurement and workforce deployment.

Proven Field Experience
Hands-on delivery across PEB structures, roads, water supply and foundation-heavy projects.

Government & Private Track Record
Experience executing smart city, JJM and defence infrastructure works alongside private projects.

Reliable Workforce Network
Ready access to skilled, semi-skilled and technical manpower for MEP and EPC requirements.

PROJECTS

A selection of completed and ongoing works across pre-engineered buildings, roads, water supply and foundation-heavy structures.

PROJECT	LOCATION / CLIENT	SCOPE
PEB Structure	Goa Shipyard HQ, Vasco	Pre-engineered building structure
PEB Structure	Belagavi	Pre-engineered building structure
Sports Infrastructure Shed	Airforce Station, Belagavi	Completed defence-station infrastructure
Paver Footpath	Belagavi Smart City	Smart-city road and footpath works
Foundation Works	Radar Complex, ICGAS Ratnagiri	Foundation-heavy defence works
RCC High-Rise Frame	Multi-storey structure	Structural civil construction
Borewell & Water Supply	JJM water supply works	Water supply infrastructure
Commercial Construction	Bangalore	Private commercial project

HOW WE DELIVER

1 Plan
Concept, site layout and master planning

2 Design
Engineering, architecture and technical coordination

3 Build
Procurement, civil works and construction

4 Handover
Quality checks and completion as one package

START YOUR PROJECT WITH US

From project development and construction to engineering consultancy and workforce deployment, Infralith provides integrated solutions designed around your project requirements.
